FEATURED PROJECTS

Track Your Workouts

React application for creating multiple workout cards and storing them in Firebase. Also tracks how many times a workout has been completed. Features React-Router and User Authentication.

React, Firebase, React-Router, User Authentication

HaikYOU

React application to create a Haiku. Type the first word and let the Datamuse API suggest the next words. Syllables are counted for you. When finished, save your haiku to a public list stored in Firebase. Built with a team.

React, API, Firebase, Mob Programming

Super Battle!

React Hooks application for selecting two fictional characters, a condition of battle, and seeing who would win. Original project was built with jQuery.

React Hooks, API, Material-UI
